## TECHNICAL PROJECTS

### Capstone Project - Skopos <https://skopos-api-monitoring.github.io/>

Sep 2022 - Dec 2022

Co-Creator, Software Engineer

Architected the design and deployment of Skopos, an open-source API monitoring tool for testing multi-step API workflows in sequence and independent workflows in parallel, using AWS services including S3, ECS, EC2, Event Bridge, Lambda, and SNS.

- Designed the data model normalized to 3NF and implemented the schema with Prisma for efficient data migrations. (Typescript, Prisma, PostgreSQL)
- Developed and unit-tested the core logic for testing multi-step API workflows and implemented the state machine for validating assertions. (Node.js, Xstate)
- Containerized application to execute tests in parallel by horizontally scaling the application using AWS load balancer. (Docker, ECS, EC2)
- Automated cloud deployment to create and configure 11 constructs on AWS using Cloud Development Kit infrastructure as code (VPC, ECS, EC2, Load Balancer, RDS, EventBridge, SNS, Lambda).
- Engineered the scheduling functionality using Event Bridge to integrate with and decouple from the backend logic. (SDK, EventBridge, Lambda)
- Contributed to the creation of UI by crafting GraphQL queries and custom react hooks. (GraphQL, React)
- Authored and presented a comprehensive case study  on the design decisions encountered while creating Skopos and the problems it solves.

### Additional Open Source Projects

Mar 2021 – Dec 2022

- **WireSnoop**: A RequestBin clone designed for receiving and debugging webhooks. Built with Nginx, Node.js, PostgreSQL, MongoDB, React.
- **Todo App**: A CRUD style todo-tracker. Built for scalability using a database adapter pattern. Built with Ruby, Sinatra, and PostgreSQL.

## SKILLS

### Backend

Node.js, TypeScript, Ruby, Python, PostgreSQL, MongoDB, Prisma, GraphQL

### Frontend

JavaScript, React/Redux, HTML/CSS, GraphQL, JQuery

### Tooling

Git/Github, Docker, Heroku, DigitalOcean, AWS Services (ECS, EC2, Event Bridge, SNS)

## PROFESSIONAL EXPERIENCE

### Philosophy Instructor

Jan 2017 – May 2021

University of Colorado, Boulder

- Led the effort to diversity the curriculum by designing a novel Global Philosophy course for undergraduates.
- Constructed and taught more than 8 courses lasting 4 months each, with around 33 students in each course.

## EDUCATION

### Software Engineering, Launch School

Mar 2021 – Sep 2022

- Attended a mastery-based online program focused on software engineering fundamentals and developed various open-source web-applications with technologies such as Node.js, Ruby, PostgreSQL, JavaScript, React.

### PhD in Philosophy, University of Colorado, Boulder

Sep 2016 – May 2022

- Read and analyzed more than five hundred articles to offer an insightful interpretation of an ancient Greek text dating more than 2500 years.

### MA in Philosophy, Georgia State University

Sep 2013 – May 2016

### BS in Maths and Philosophy, Saint Peter's University

Sep 2008 – May 2012
